Dear Greenwich Resident,

Refurbishment of Tank 6033 at Shell's Gore Bay Terminal.

Shell is currently in the process of the statutory refurbishment of Tank 6033 at Gore Bay Terminal. Shell is at the stage of the refurbishment where we need to remove and then re-apply an internal and external coating, which preserves the integrity of the steel surfaces of the tank.

The work we need to undertake to remove the coating will generate more noise than you would normally hear from the terminal. To minimise the noise to residents we have erected a scaffold to fully encapsulate the tank and will make every effort to keep noise levels as low as possible.

The work programme will commence in July 2010 and, weather permitting, we expect to be completed in November 2010. The hours of work to comply with council requirements will be 7:30am – 4:30pm Monday to Friday, Saturday 7:30am – 2:30pm. The noise will not be continuous during the above period.

The tank will be painted green to assist in blending into the landscape and reduce our impact for our neighbours.

We appreciate your patience throughout this important works programme. If you have any questions or concerns, please contact Brent Geeves at Shell on 8437-1226 or the Senior Terminal Operator on 8437-1238.

We will be working hard to minimise the disruption and time taken to complete our statutory requirement. We will write to you again when the works are nearing completion.

Kind Regards,

Stuart Davis
Production logistics Manager
